# Mert Onur Cakiroglu

PHD STUDENT · COMPUTER SCIENCE

Indiana University, Luddy School of Informatics, Computing, and Engineering 700 N Woodlawn Ave, Bloomington, IN 47408 meocakir@iu.edu | # mert.it.com | Cumpus99 | mert-onur-cakiroglu

## Research Interests

My research focuses on the intersection of machine learning, temporal data, video learning, and representation learning. I develop advanced models to improve video understanding, particularly in compressed domains and through selfsupervised techniques. Additionally, I explore novel methods for representing low-dimensional sequential data, such as protein sequences and univariate time series, using de Bruijn graphs to enhance model performance in classification and forecasting tasks.

Education \_\_\_\_\_

Indiana University, Luddy School of Informatics, Computing, and Engineering РнD Сомритек Science • Advisor: Prof. Dr. Mehmet M Dalkilic • Co-Advisor: Dr. Hasan Kurban	Bloomington, Indiana Fall 2023 – present
<b>TOBB University of Economics and Technology</b> BS COMPUTER SCIENCE	Ankara, Turkey 2017 – 2021

## Publications \_\_\_\_

Conferences

## Research Experience \_\_\_\_\_

## Texas A&M University at Qatar - Temporary Research Associate

## Advisor: Dr. Hasan Kurban

Doha, Qatar

May. 2024 – Jul. 2024

- Developing a self-supervised learning framework for video data, enabling the model to learn meaningful representations without labeled data, improving video understanding tasks such as classification and segmentation.
- Implementing federated video learning in the compressed domain, optimizing the model's performance while preserving user privacy and reducing communication overhead in distributed learning environments.

## Student Researcher - Kurban Intelligence Labs

#### Advisor: Dr. Hasan Kurban

- Conducted research and authored academic papers on time series forecasting, Type 1 Diabetes hypoglycemia detection, and protein classification.
- Currently conducting research on video learning, self-supervised learning, and representation learning using de Bruijn graphs.
- Laboratory Website: kurbanintelligencelab.com

## Work Experience \_\_\_\_\_

#### **Innova IT Solutions**

#### FULL-STACK SOFTWARE DEVELOPER

- Contributed to the development of the "Centralized Fault Management System (MARS)," designed to provide end-to-end fault detection, diagnosis, and resolution for telecommunication networks and IT infrastructures.
- Improved legacy codebase and developed new functionalities based on functional specifications and business requirements.
- Gained experience working in an agile development environment.
- Developed microservices using Spring Boot, interacting with PL/SQL and MongoDB databases in a microservice architecture.
- Worked on front-to-backend interactions using React.js and Vaadin frameworks, utilizing RESTful services for seamless integration.
- Project Website: https://www.innova.com.tr/en/centralized-fault-management-system-mars

#### **CSCI-C 200 Introduction to Computers and Programming**

#### ASSOCIATE INSTRUCTOR (TA)

• Instructor: Prof. Dr. Mehmet M Dalkilic

## Awards and Recognition \_\_\_\_\_

2023 Fall 2023 Luddy Doctoral Associate Instructor Fellowship, Luddy School of Informatics, Computing, and Engineering

Jul. 2021 – Apr. 2023

Spring 2023 – Ongoing

Aug. 2023 – Ongoing
